

Post__Event__Report

Sam Gottuso

December 7, 2017

Intro

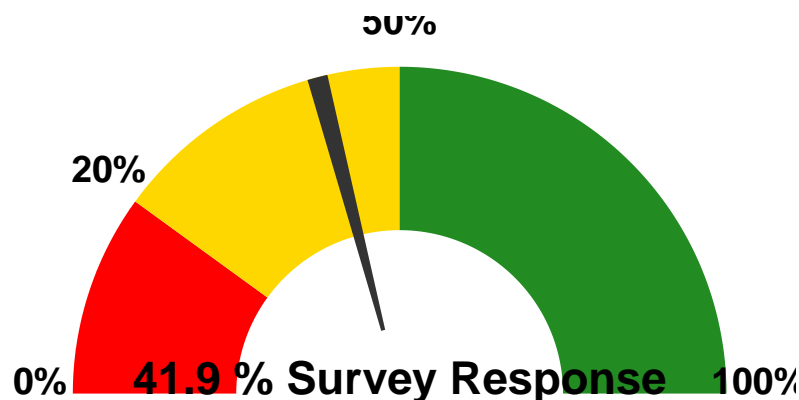

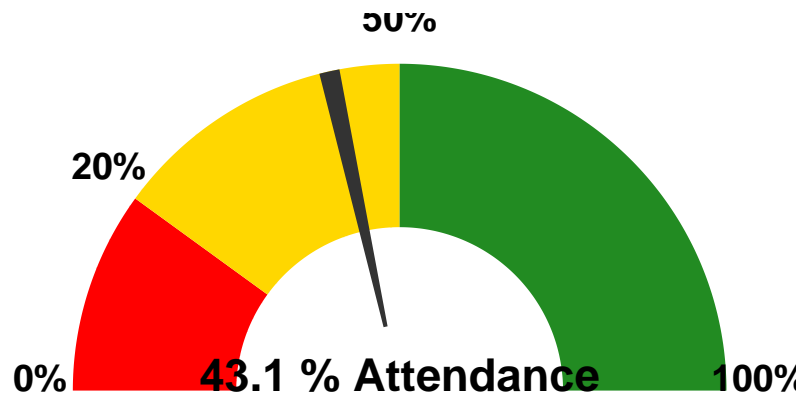

This is a (mostly) automated post-event report that tells a story with our data, and compares to other recent and similar events so that everything we present to the client is viewed in context. It will also help us benchmark our performances in Program Year 2 as we look to build upon the success that we experienced during the first year of CPC+.

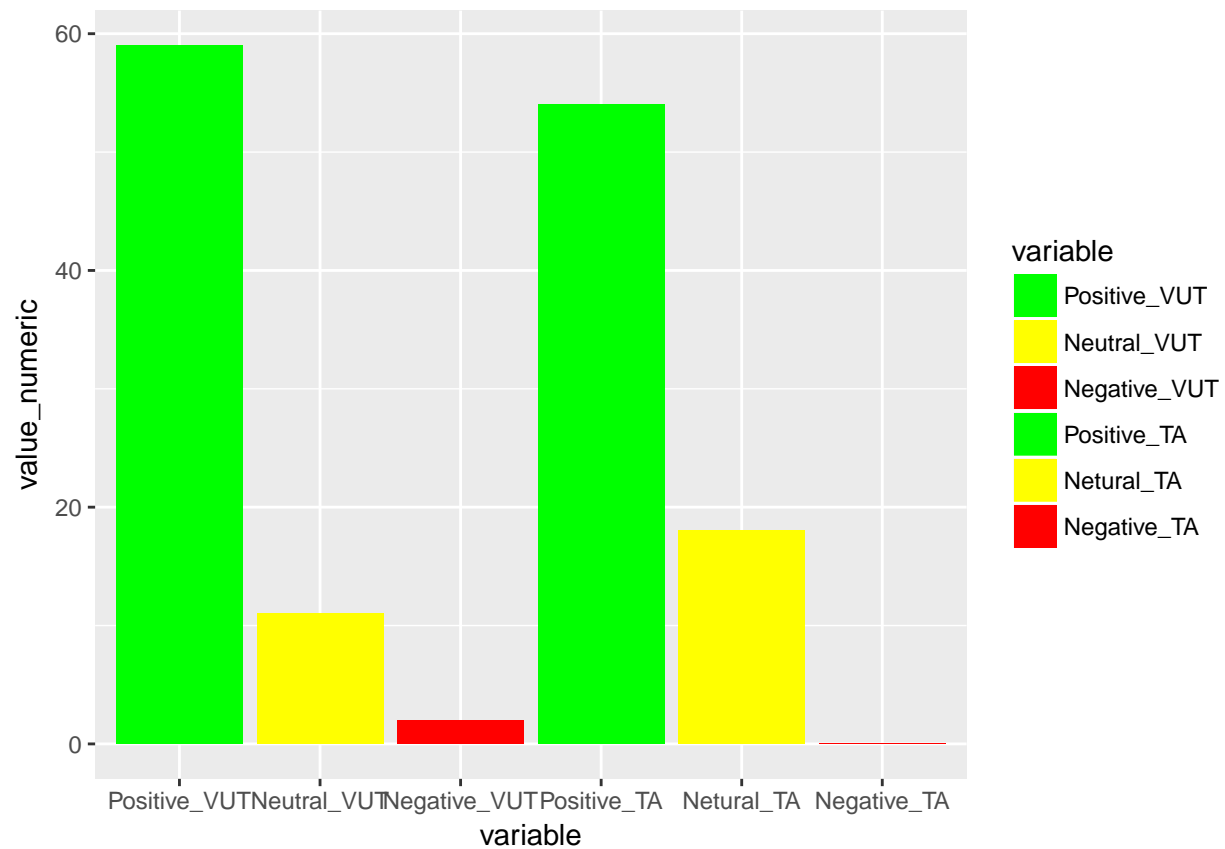

Last Event

This section looks at PIA 9: Timely Exchange of Hospital and ED Data which took place on 2017-12-12. It had 172 attendees with 43.1% of registrants attending.

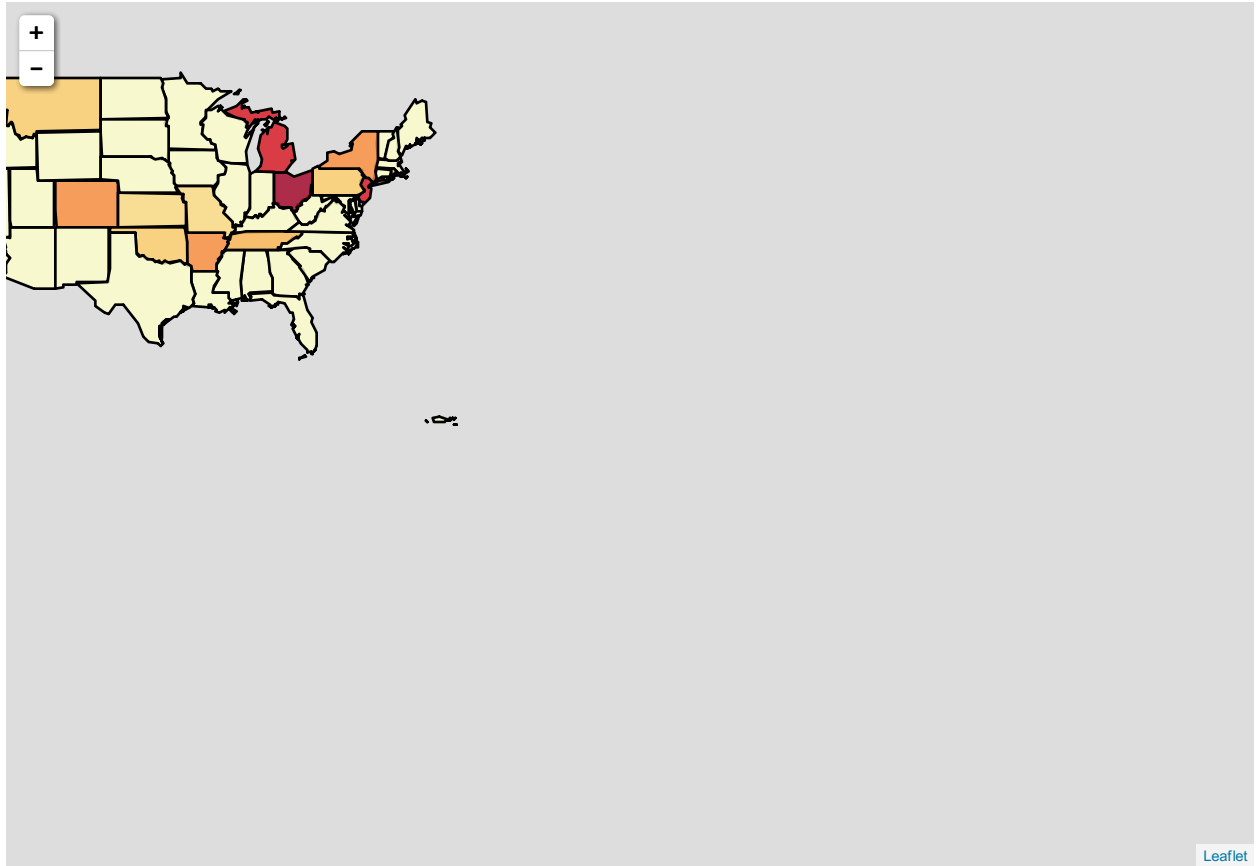

There were 72 respondents to the survey. This first graph shows how they responded to the “Valuable Use of Time” (VUT) and “I will take Action” (TA) questions on the survey.

Attendance and Survey Response Rates

This map shows us a representation of where practices were attending from.

This table gives a breakdown of Attendees by role.

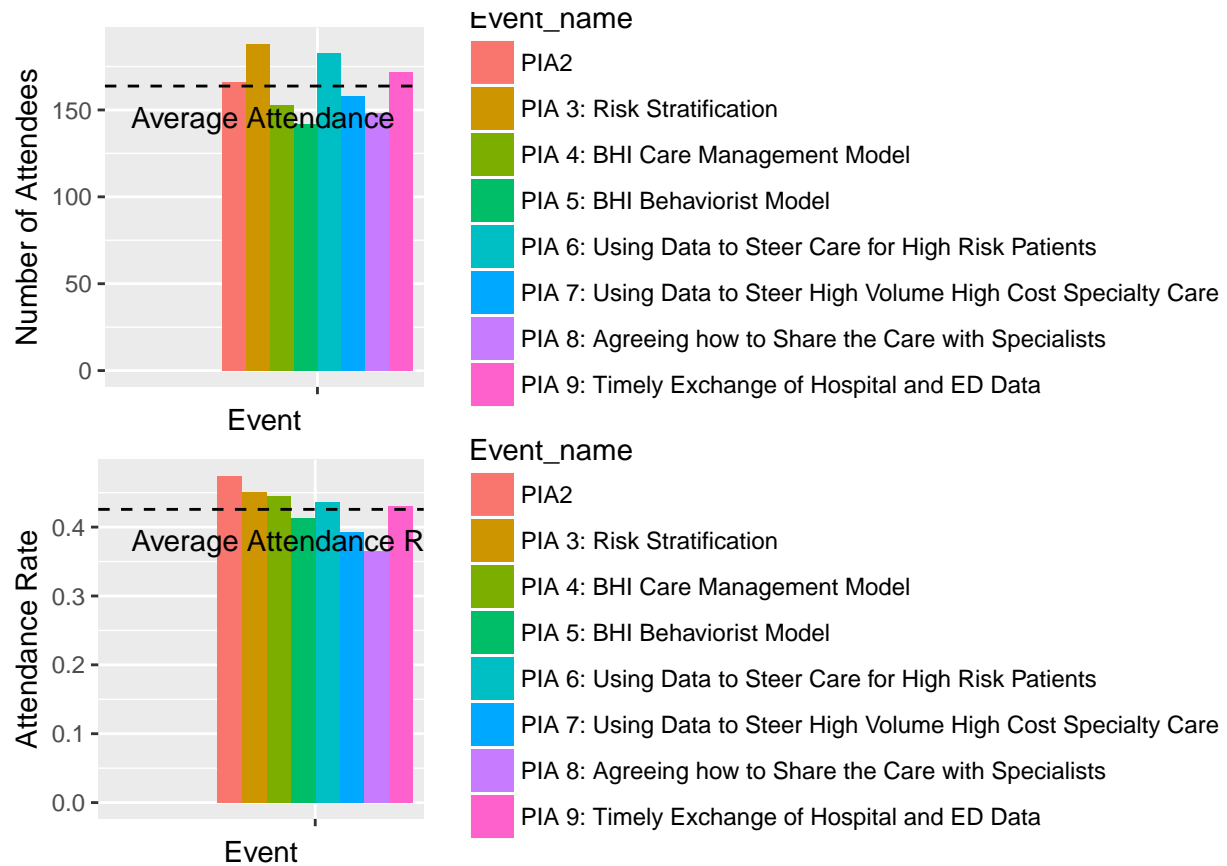

Table 1: Attendance by Role

Role	Number of Attendees
Administration	48
Clinicians	3
Care_managers	57
Data_analyst	8
Project_managers	21
Project_director	5
Quality_improvement	7
CMS	1
Contractors	12
Payers	2
Vendors	0

Same Type Comparison

This event had a higher attendance than the average attendance for this type of event and a higher number of practices attend compared to the average. For the survey, it had a higher rate of response compared to other similar type events.

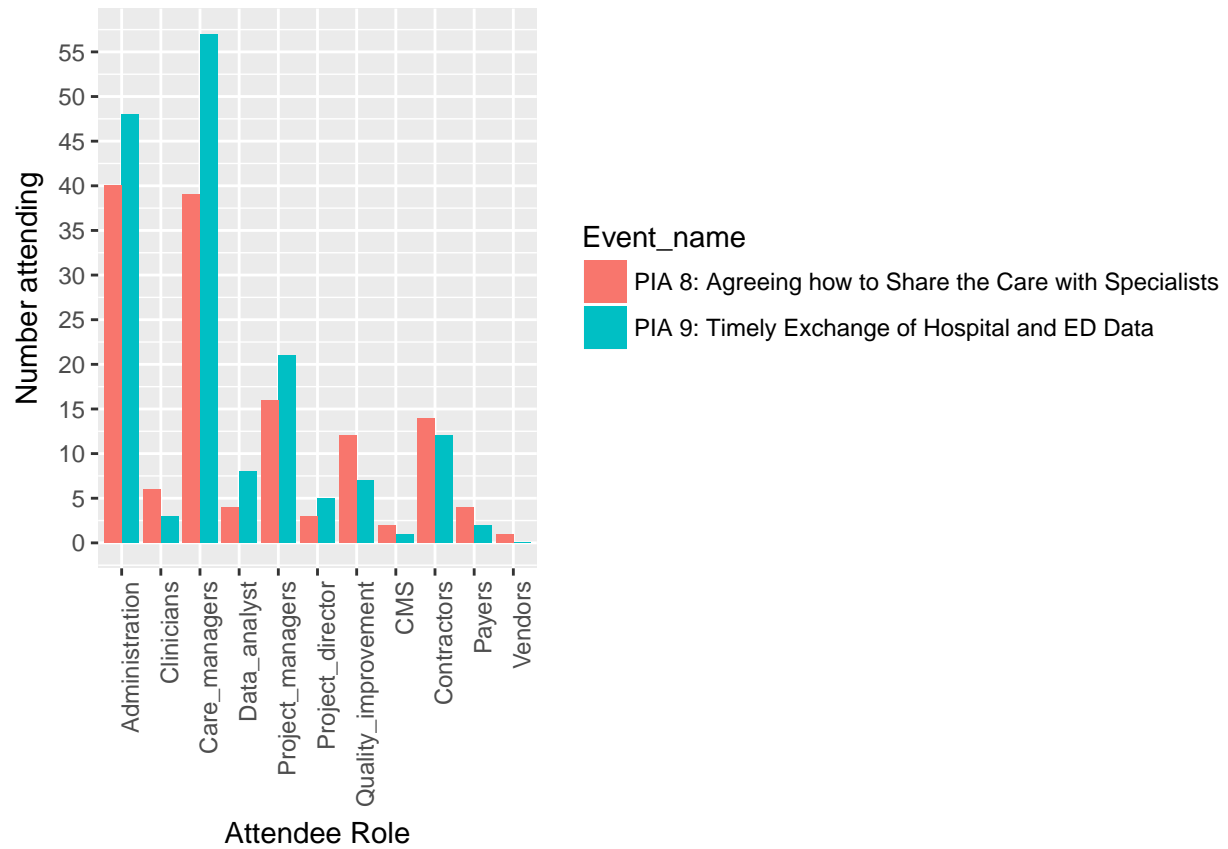

These graphs compare the last event to all of the other events of the same type.

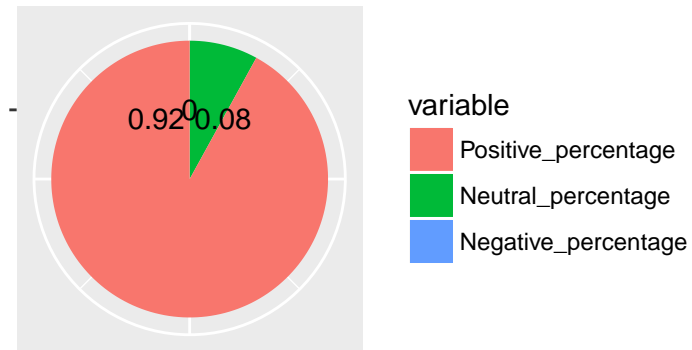

Previous Event Comparison

This section gives a more in-depth breakdown between PIA 9: Timely Exchange of Hospital and ED Data and the previous PIA, which was titled PIA 8: Agreeing how to Share the Care with Specialists and took place on 2017-12-05.

This first plot shows the distribution of attending roles for each event, while the second shows the comparison between positive responses to the survey question “Attending this session was a valuable use of my time”.
